

Fakorede Damilola

Front end web developer

PROFILE

I am a developer who loves creating impactful brands and products.

As I've grown as a developer, I have built awesome projects which have opened my eyes to what is expected of any web application. Through these experiences, I've built memorable products that are not only enjoyable to use, but are written in code that's maintainable and easy to understand

WORK EXPERIENCE

Freelance web developer - August 2020 – present

Built a fully functioning blog with the basic CRUD (create, read, update, delete) application for a client.

Built a quiz web application to help students from Nigeria that plan on writing the JAMB (joint admission matriculation board) examination prepare for the examination.

Built a mini paint web application, that allow people easily draw on it and download the canvas has an image.

Currently working on a voting website with react that allows people easily set up their election by themselves and get the result at the time they designate.

Imagine Front end web developer - Feb 2020 – August 2020

Worked on a conference website, that trains teenagers (final year secondary school students) from Nigeria and Ghana become better leader. Certificates are issued at the end of the program (recognized).

Responsible for designing and developing the user interface for the conference website.

Technologies used include HTML, CSS, JavaScript and a little bit of jQuery.

Worked closely with the senior developer and CEO to build a fully functioning and accessible website.
